

Benefits in having a Prestige Synthetic Lawn

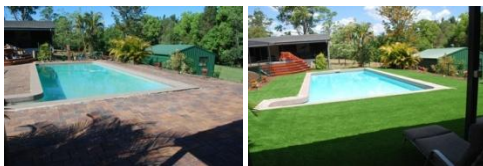

No Watering – The Prospect of sustaining a high quality lawn under a climate of severe water restrictions is almost impossible. Prestige enables Lush, full bodied grass sections all year round.

No Mowing – A person who mows their lawn for 1 hour every second week will spend a total of 26 hours a year mowing their lawns. With Prestige Synthetic Lawn, there is more time for leisure & family as well as less exposure to allergies and potential injuries.

Minimal Additional Maintenance – Once installed, Prestige Synthetic Lawn requires minimal maintenance. If there is significant leaves falling in the area, buy yourself a power blower or vacuum to remove the loose debris from your lawn area then bask in the lush green surrounds.

It's got the look – Even the most dedicated gardener is currently maintaining more of a golden yellow lawn than a lush green landscape. With Prestige, your house or landscape area can have the look of a tropical oasis.

Add to property value instantly – Many real estate agents preach the importance of a presentable garden. After all, first impressions count and lawns are often the first item noticed at a property. For those looking to sell quickly or make a long term investment in the value of your property, Prestige can have your property looking brand new within a couple of days dramatically increasing your chances of getting the best price under the hammer.

FAQ's

Q. How long will my synthetic lawn last?

A. The average industry life expectancy is 15 – 20 years

Q. Will Prestige Synthetic Grass drain?

A. Yes. Our grass is designed with drainage capabilities, which enable water to filter through.

Q. Where is Prestige Synthetic grass made?

A. Our materials are sourced and manufactured in Australia. Currently there are many inferior imported products, which don't have the same performance capabilities. Be sure to research any material thoroughly prior to your purchase.

Q. How long does an installation take.

A. We work off approximately 1 day per 50sqm. This is a rough estimation and may vary depending on how much excavation is involved.

Q. What ongoing maintenance is required.

A. Once installed, be sure to use a blower to get rid of loose leaves and sticks that may fall on the area. With a golf green you may need to call us every couple of years to perform a free roll of your green if undulations caused by movement appear.

Q. Does the material offer any hazards to children?

A. Our turf is safe for kids to play on. It qualifies as an accredited soft fall alternative making it ideal for child play areas, and schools.

Q. What colours does the grass come in?

A. We produce a range of colours including green, white, Terracotta (red), blue and yellow.
